wood glue		
1.25" brad nails		
2" brad nails		
metal hook		Check Ryobi Nation for link

Remember!

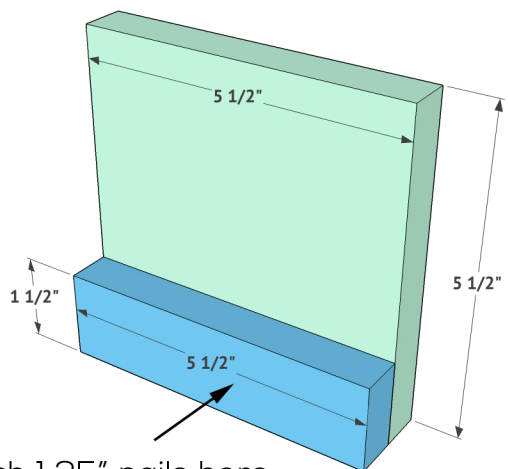

Many of these cuts are best made as you go. If you have questions, check out the tutorial on our site!

CUT LIST

This is a great project to use your scraps on! Be sure to check your scrap pile before buying any wood!

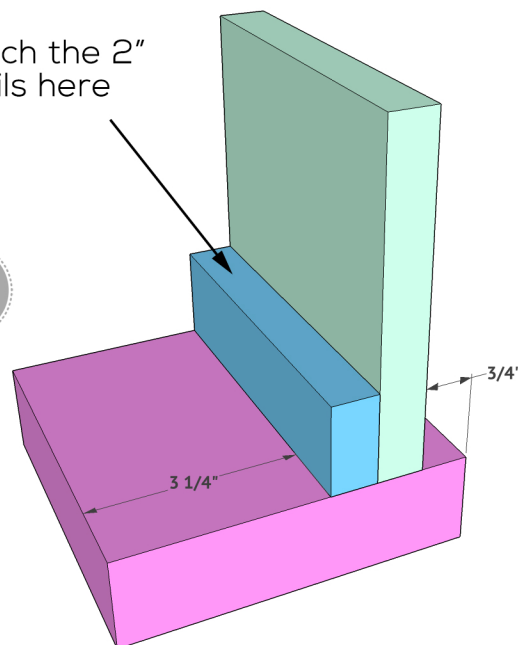

1

First, attach the 1x2 board to the 1x6 board using wood glue and 1.25" brad nails. Make sure the 1x2 board is flush with one end of the 1x6 board.

*attach the 2" nails here

2

Next, line up the two boards you just attached 3/4" from the edge of the 2x6 board. Attach the two boards to the 2x board using wood glue and 2" nails through the 1x2 board and into the 2x6 board.

Final step is adding your finish! You can paint or stain yours to fit your decor. Once it dries, add the hook! You can see the link to the hook we used on Ryobi Nation.
